DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities. Appropriate correction is required.

(a) In line 12, "presented" should be -- represented --.

(b) The marker "(I)" should follow the first catalyst structure to correspond to the description at line 12 (compare original claim 2).

Claim Rejections - 35 USC § 112

2. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1 and 2 (and claims 3-7 as dependent thereon), describing MFR_2 with the superscript "-0.53" in formula (ii) cannot be found in the specification as filed. It would appear that the superscript "-0.55" should have been included.

Claim Rejections - 35 USC § 102

2. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kishine et al. (US 6,063,871) for the reasons set forth in item 2 of the Office action mailed 6/29/2007.

Applicant's arguments filed 1/9/2008 have been fully considered but they are not persuasive. Applicants argue that the reference does not disclose activation energy. This is correct; however, applicants have provided no basis to conclude that the reference polymers would fail to have the claimed activation energy, particularly in view of the fact that previously cited US 7,205,358 indicates that applicants have claimed virtually the entire conventional range for this parameter. Applicants further argue that the applied examples do not include claimed requirements (ii) and (vii). However, using applicants' own calculation and tables, simple inspection of Tables 1 and 2 shows that Example 4 includes the claimed properties. Specifically, Table 1 shows that Example 4 includes the required MFR and has a value of $[\eta]$ which is between the upper and lower limits stated in the table, and therefore this example includes property (vii). Similarly, Table 2 shows that Example 4 includes the required MFR and has a value of MT which is between the upper and lower limits stated in the table.

3. Claim 8 is allowed over the prior art currently of record.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.
